**Invisible "hotspots"
add interactivity
when using uploads**

Page menu

Page settings

The screenshot shows the Fluid UI editor interface. A 'Page settings' panel is open, displaying the following options:

- Start page:** A toggle switch currently set to 'No'.
- Orientation:** A toggle switch currently set to 'Portrait' (represented by a vertical rectangle icon).
- Width:** A numeric input field set to 320.
- Height:** A numeric input field set to 568.
- Device settings...** and **Project settings...** (both with gear icons).

Three green arrows point from text annotations to specific settings:

- An arrow points from the 'Start page' toggle to the text: **Make this page the start page**
- An arrow points from the 'Orientation' toggle to the text: **Portrait or landscape page orientation**
- An arrow points from the 'Width' and 'Height' fields to the text: **Set the width and height of your page**

The screenshot shows the FluidUI editor interface. A central panel titled "View settings" is open, displaying several configuration options. Green arrows point from text labels to specific controls in the panel:

- Snap widgets together** points to the "Snapping" toggle, which is currently set to "On".
- Turn grid on/off** points to the "Grid" toggle, which is currently set to "Off".
- Change how you zoom in** points to the "Camera" dropdown menu, which is currently set to "Smart".
- Zoom in more/less** points to the "Max zoom" slider, which is currently set to 75%.

The "View settings" panel also includes a "Mouse zoom" toggle (set to "On") and a "Max zoom" slider (set to 75%). The interface includes a top toolbar with icons for undo, redo, save, play, and delete, and a bottom toolbar with a clock icon and a trash icon.
